# Friend.ly

## **What the project is about**

The goal of Friend.ly is to unite all users in one messaging service. Users are able to create an account, which will allow them access to a chat window. From there the users will be able to choose a contact and start a conversation.

## **Version 1 features**

- o Login/Register
- o Add Contact
- o Crud
- o Messaging Collection in database

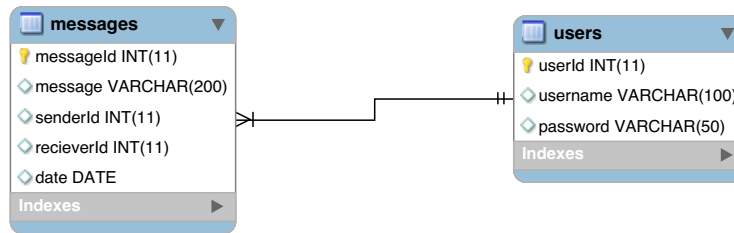

## **Version 2 features**

- o Online Status
- o Search Users
- o "Friend Request"
- o File sharing
- o Facebook Contact Sync
- o Badges for unread messages

Friend.ly is a **free** to use private messenger application  
Join today to get access to all these cool features! **Keep everything safe**

We keep everything backed up to a database so you never have to worry about erased conversations or internet fails.

 **Sync all your contacts**

By integrating with the Facebook API you can instantly sync all of your friends contact information into your chat window

 **Manage all your projects**

Friend.ly can keep track of multiple conversations at once and it even keeps track of when your friends are online.
